ADDITIONAL INFORMATION

Start as soon as possible

As market leader in enterprise application software, SAP helps companies of all sizes and industries run better. From back office to boardroom, warehouse to storefront, desktop to mobile device – SAP empowers people and organizations to work together more efficiently and use business insight more effectively to stay ahead of the competition.

PURPOSE AND OBJECTIVES

The mission of Application Innovation is to re-invent enterprise software with breakthrough new applications creating customer value beyond today's imagination. The vision is to amaze the installed base and grow in new markets by providing world class products based on leading technologies and by establishing solutions as the de-facto standard for the world's business. One key goal is to empower customers to compete like never before by enabling superior business models, highest decision speed, highest flexibility and innovation edge with the latest technologies.

We offer you a position as Developer Associate within a highly motivated team in the area of Portfolio and Project Management, based on Javascript, HTML 5, ABAP, and HANA Technologies.

EXPECTATIONS AND TASKS

As Associate Developer in our development team in the area of Portfolio and Project Management you will work along the complete lifecycle of software development projects together with colleagues contributing towards customer success. You will implement user stories based scenarios leveraging state of the art technologies on our S/4HANA platform.

You will demonstrate a strong drive for development execution. Based on your knowledge you will design, implement and test software solutions by applying the dimensions quality and transparency. As a team player you take over responsibility for dedicated development tasks. You will contribute to the team spirit by supporting an environment of continuous learning, by exchanging ideas & thoughts and by embracing a culture of innovation.

EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

- University Degree (bachelor, master, diploma, PhD) in information technology, computer science, mathematics, engineering or related area
- Fluency in English and German language - verbal and written
- Experience in at least one OO programming language, Javascript and ABAP know how preferred
- Profound knowledge in SQL is an advantage
- Open minded, problem-solving attitude and positive spirit even under challenging conditions
- Expertise in Supply Chain Management, Finance, Product Lifecycle Management or Portfolio and Project Management is an advantage, but not a must
- Ability to quickly understand customer business process requirements
- Very good analytical thinking and problem solving
- Ability to generate and promote new and creative ideas
- Ability to work in new, dynamic environments
- High quality orientation and reliability
- Team player with strong communication skills

Your set of application documents should contain a cover letter, a resume in table form, school leaving certificates, current university transcript of records, copies of any academic degrees already earned, and if available, references from former employers (including internships).

Developer Associate: JavaScript - HTML5 Development
